Chief of Procurement and Supply

17 Dec 52

Assistant Director for Communications

Contracts (RD) XG-726 and RD-35 with

25X1

REF: ISO/PD 1005 dated 1 December 1952

1. The reference asked technical advice as to the validity of the contractor's request to be permitted to market commercially the Carrier-Controlled Relay, Model 3801, developed for the Agency under Contract (RD) XG-726.

2. This Office interposes no objection to the commercial use of this equipment since its construction is based upon well-known engineering principles and practices. We are in no position, however, to comment on the patent rights or other legal details which may arise when the equipment is sold commercially.

3. Although we concur in the manufacturer's contention that the equipment and its operation do not require classification, we wish to stress the fact that the association of the Agency with the development or use of the equipment shall continue to bear the classification of SECRET.
